The revised Waste Framework Directive (2008/98/EC), enacted on 4 July 2018, was the basis for the European Chemicals Agency (ECHA) to establish and maintain a database with information on substances of concern in articles and complex objects (products). This database is referred to as the SCIP database. Article 9(1)(i) of the Waste Framework Directive extends the duties of suppliers regarding Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration Evaluation Authorization and Restriction of Chemicals (REACH) Article 33. These extended duties require the communication, under certain conditions, of information about the presence of Candidate List substances of very high concern (SVHC) in their articles to ECHA.

To view the IHI REACH Declaration please see the following compliance document:

https://lugsdirect.com/PDF%20Documents/IHI_RoHS&REACH&CertificateOfConformanceByPartNumber.pdf

IHI is a US based company and is not responsible for uploading data to the EU SCIP database. However, for the convenience of its customers IHI has compiled the following information.

The IHI Products (complex objects) on this list contain articles that have a REACH SVHC above threshold.
