STANDARD 1/8" DIA. BUSHING
REQUIRED TO FIT OVER
CONNECTOR AND 22288 STEEL SCREW

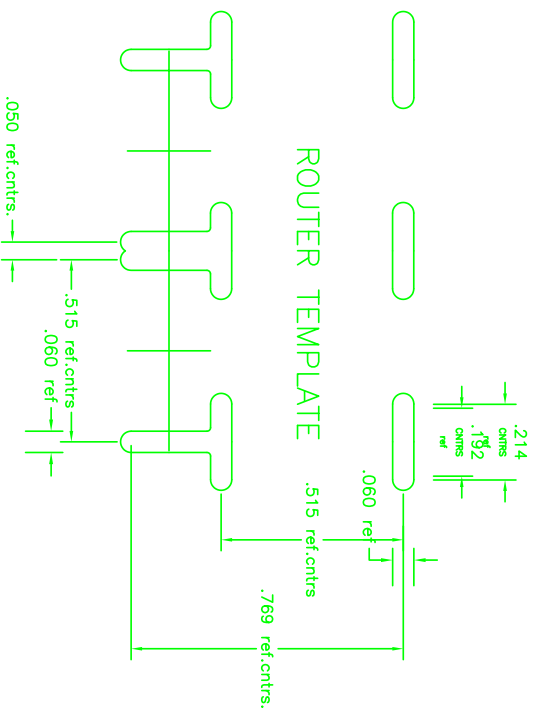

DETAIL OF 14927 BUSS

COPPER STAPLE BUS LAYOUT

Board requires a routed slot .06 wide x .192/.214 cnts. long on .515 centers. Hole size in board can be varied to control fit from drop-in to force fit on corners.
An assembly of three connectors requires two staple bus parts to be ordered with each three connectors.
Refer also to data sheet on this part.
All PCB layouts are tested by user for satisfactory performance. IH does not guarantee the performance of any end use configuration. UL and CSA approvals are for the connector and bus. All final assembled configurations must be tested to UL/CSA satisfaction to appropriate standards by the user. Typically in-situ heat rise, assembled pull out and other tests are required.
